E-TROLZ Raises \$500,000 in Private Equity Round

Lawrence, MA – June 13, 2006

E-TROLZ, Inc., an innovator of highly integrated signal acquisition and data management products for electrophysiological medical device OEMs, announced today the successful completion of its second Private Placement investment round. “We are pleased to have achieved our maximum goal of \$500,000 in this second investment round” said Jim Robertson, Chairman and CEO of E-TROLZ. “This new capital investment will be used to accelerate our electrophysiological product development and testing”.

About E-TROLZ

E-TROLZ is a global technology leader providing highly integrated real-time measurement and control products for electrophysiological medical devices. Leveraging its proprietary Dual Partition Tri-Core Architecture™, E-TROLZ’s products optimize signal acquisition and data management interoperability in a small portable form factor. E-TROLZ’s highly integrated products enable dramatic savings for customers in project development cost, time to market, and total cost of ownership. E-TROLZ is the ideal partner for companies who focus resources on software development for the detection of neurological, cardiac, and respiratory disorders. More information about E-TROLZ is available at www.e-trolz.com.
